MARTRON WEH-1000 HEAVY METAL CO-PRECIPIPARATOR & COAGULANT

MARTRON WEH-1000 is a heavy metal co-precipitator and coagulant. **MARTRON WEH-1000** works well in wastewater systems where chelates or low metal levels (500 ppm or less) make floc settling or liquid-solid separation difficult to accomplish. **MARTRON WEH-1000** can be used in both flow- through and batch treatment operations. Effectively replaces more expensive or more hazardous materials such as ferric, chloride, alum floc, ferric sulfate, etc...

TYPICAL PROPERTIES

Color: Clear to hazy
Specific gravity: 1.335
pH (1 % solution) : 3.5

APPLICATION

MARTRON WEH-1000 works well if introduced to the wastewater stream either before or after pH neutralization. The resulting coagulated material can be further flocculated with other chemicals.

Treatment Levels

Dosages range between .10 - .75 gallons per 1000 gallons of wastewater.

Health and Safety

May be irritant to eyes, skin, and mucosal membranes. Avoid inhalation of mists. Harmful if swallowed. In the event of eye contact, flush eyes with large amounts of water for 15 minutes, lifting upper and lower eyelids occasionally. Obtain medical attention.

For skin contact, wash immediately with plenty of soap and water. If irritation occurs or persists, obtain medical attention.

If swallowed, give two glasses of water, and call a physician immediately. Never give anything by mouth to an unconscious person.

If inhaled, remove to fresh air.

Warranty!! This product is guarantee as to quality upon shipment from our plant. If the use recommendations are followed, desired results will be obtained. Since the use of our product is beyond our control, no guarantee expressed or implied is made as to the effects of such use or the results to be obtained.

For Industrial Use only
